This product Small size, easy installation, simple use, no frames, no leakage seconds, no use of car memory, etc. With android large screen car to bring you amazing effect.

### ATTENTION

---

1. Standard C10 speed genuine TF card is recommended.
2. When replacing or using a new TF, it is recommended to format the page facing the card with advanced Settings.
3. No photos or videos can be taken after a certain period of time  
Solution: Check if the TF card has enough space to shoot videos, and if there is not enough space, it will automatically stop. The format operation will delete video in the protected folder, if any Important video, note to save first), if still cannot record, suggest to change TF.
4. The image was foggy  
Solution: The lens is not clean enough, please check the lens for stolen goods and finger marks. Clean the lens with lens paper.
5. Click on the app and you can't enter the preview screen  
Solution: It may be that the USB port is loose, at this time. Try replugging the dashcam
6. Do not record automatically or stop recording immediately after clicking the record button.  
Solution: It is very likely that the format of the card is not correct, you need to enter the Settings to format the operation.
