## WARNING & PRECAUTION

To avoid risk of serious injury or possible violation of laws, please read the following thoroughly before installation or connecting.

This symbol means important ban. Failure to heed them can result in serious injury or death.

This symbol mean important instructions. Failure to heed them can result in injury or material property damage.

Having the wiring and installation done by expert. The wiring and installation of this unit requires special technical skill and experience. To ensure the safety, always connect the dealer where you purchased this product to have the work done.

Do not watch video or operate the unit while driving.

Be sure to use specified accessory parts and install them securely.

Do not install in location which may hide vehicle operation, such as steering wheel or gearshift or cover of air bag.

Be sure to use the correct ampere rating when replace fuses. Failure to do so may result in fire or electric shorts.

Do not touch antenna or any plugs while in thunder storm to avoid electric shock.

Be sure to disconnect the cable from the negative battery terminal while installation. Failure to do so may result in electric shock or injury due to electrical shorts.

Do not damage wiring. Failure to do so may result in electric shock or fire due to electrical shorts.

Be sure to connect 'Parking Break' lead so that the driver can not watch the video unless the vehicle is stopped. Failure to do so may result in traffic accident or violation of laws.

Do not install in locations with in high moisture or dusty. Moisture or dusty that penetrate into this unit may result in product failure.

Be sure to check the installation of antenna regular. Antenna dropping may result in an accident while the vehicle is running.

# PRODUCT FEATURES

---

## Hi-Fi Audio

- 5.1 Audio Pre-output
- DSD Audio Playback
- Hi-Res Audio Playback
- Lossless Music Playback
- Center Audio Output
- Subwoofer Audio Output
- Digital Audio: Optic Output
- Digital Audio: Coaxial Output
- High-Power ST7851
- Maximum Power 4x50w
- Professional DSP
- Built-in 36-Band EQ
- Q Value Adjustment
- 20 Preset Sound Effects
- DTS Surround Sound
- Supports TruBass
- Supports Audio Focus
- Supports Circle Surround
- Supports Phantom Center
- 5 Presets DTS Processing
- Supports 4CH,4.1CH,5.1CH
- Supports DP1.4, USB 3.0, TYPE-C interface

## Configuration

- 1920x1080 QLED IPS Screen
- 2.5D G+G Full Glass
- Qualcomm 8 Core A76 CPU
- NK13.0 Operating System
- 6+128GB | 8+256GB | 12+512GB Large Memory
- Built-in 360 Panorama
- High Sensitivity Radio
- Support 4G Network
- AHD Camera input
- Built-in Bluetooth 5.0
- Supports HDMI Output
- Supports Optical Fiber Output
- Capacitive Screen
- 500 Lumens LCD Screen
- Built-in GPS
- Supports 2.4G/5G Wifi
- USB Playback
- 2160P Video Playback
- Supports iOS Phone Mirrorlink
- Supports Android Phone Mirrorlink
- Supports Bluetooth Music Playback
- Supports mobile phone wireless charging  
(Only for NAM5980PRO-AL40)

Note: Yellow highlighted at the bottom of icon indicates that the View mode is selected currently.  
Click []System Settings to enter the 360 system settings page, and open 360 stitching in parameter management.

-  Video: Click to see the front, back, left and right video.

# GPS ANTENNA CABLING INSTALLATION

## GPS Antenna Wiring Diagram

### Notice:

1. The GPS antenna can be installed inside the car, such as on the instrument platform, or outside the car, such as on the roof.
2. The GPS antenna must have an open "view" facing the sky. If the vehicle glass is affixed with explosion-proof film or heat-insulating film, it may greatly reduce the intensity of the satellite signal received by the GPS antenna; in this case, it is recommended to install the GPS antenna outside the vehicle.

### GPS antenna installation steps:

1. Before pasting the GPS antenna, be sure to clean the adhesive area with an appropriate oily cleaner. After cleaning, tear off the paper on the back, place the GPS antenna and press it firmly.
2. Remove the side panel and pass the cables through the storage compartment until they reach the main console, making sure that the GPS cables are tied securely to the original cables.
3. Connect the GPS antenna plug to the host computer.

# CAMERA WIRING INSTALLATION AND SETTING

## Camera Wiring Installation Diagram

### Rear mirror type setting

1. Press [F4] on the panel to enter the home page.
2. Click [F5] to enter the setting interface.
3. Click to factory reset password 1948.
4. Click to switch the reversing camera mode: normal reversing, reversing 360.
5. Reversing camera format selection: TVI and AHD

### Installation steps of the reversing image wing:

1. Connect the reversing signal cable plug to the host, remove the left side panel, pass the camera extension cable through the center console driver's seat, then pass the cable through the trunk and remove the waterproof sealant on the side of the vehicle. Glue to the sides of the rear cockpit and fill the trunk with score lines.
2. Remove the lining of the trunk door. The camera device is located above the license plate. Insert the camera cable into the trunk and connect it to the extension cable. It needs to be wrapped with electrical tape when docking.
3. The positive pole of the camera power supply is connected to the positive pole of the reversing light, and the negative pole is connected to the positive pole of the reversing light. Please note that it needs to be wrapped with electrical tape.

The screenshot shows the 'Settings' app with 'Wireless Network' selected. A red outline highlights the 'Wi-Fi' toggle switch, which is currently turned on. Other visible settings include 'Mobile Network', 'CPU Usage', 'General', 'Factory', 'Wired Settings', 'Proximity Settings', 'Display', and 'Sound'.

1. Click [Wi-Fi] to turn on wifi.
2. When Wi-Fi is turned on, the machine automatically searches for nearby Wi-Fi connections.
3. Enter the password.

4. Click [Mobile network] to enter the open mobile network.

[illegible]

> Fan setting  
1. Click [Fan control mode] to select manual mode, CPU temperature mode and volume mode.

The screenshot shows the 'Settings' app with the 'Factory' option selected. The 'Factory' option is highlighted with a blue circle. Below it, the 'Reset settings (factory defaults)' option is also visible. The 'Factory' option is the correct choice for a full system reset.

1. Click [ Factory ]and enter the password[ 1948 ]to enter the factory setting interface.

The screenshot shows the Windows 10 Settings application. On the left, the 'Settings' sidebar is visible with various categories. The 'Factory' option is highlighted in grey. The main pane on the right is titled 'Factory' and contains the following settings:

- Automatic recovery on:** A toggle switch that is currently turned off.
- Reset your PC to return it to original state:** A link to reset the PC.
- Always make backup:** A toggle switch that is currently turned on.
- Find my device (Windows Security):** A link to manage device location.
- A key to support:** A link to get support.
- Update recovery services:** A toggle switch that is currently turned on.

Below these settings, there is a section for 'Firmware' with the following options:

- Secure Boot:** A toggle switch that is currently turned on.
- Secure Boot:** A toggle switch that is currently turned on.
- Secure Boot:** A toggle switch that is currently turned on.
- Secure Boot:** A toggle switch that is currently turned on.

# SETTING

## Protocol Setting

**PATH:** Home Page > Settings > Protocol Setting  
This interface can be used to set Car type, Air conditioning, Backcar track, etc.

## Sound Setting

**PATH:** Home Page > Settings > Sound  
Can set key sound to on or off, adjust media volume, Navigation volume, bluetooth volume, GPS mixing, music dro ratio when reversing.

## System Setting

**PATH:** Home Page > Settings > System  
This interface can set: Languages & input, Date & time, Software updates, Reset options

## Reset to Factory Settings

**PATH:** Home Page > Settings > System > Reset options  
1. Enter the password "1948" to enter the Reset options interface,  
2. Click [Erase all data (factory reset)] to restore the factory reset.

## About Device

**PATH:** Home Page > Setting > About device  
1. In this interface, you can view the version information of the machine.  
2. You can view the version upgrade schedule.

## Clean Interface

1. Pull down the top of the screen and [Clean] will appear. Click the icon to pop up the clearing interface.  
2. Click [Clean] to clear memory.

# SETTING

## SWC Keys setting

**PATH:** Home Page > Setting > Control 

1. Learn each function button as prompted.
2. After learning the steering wheel function keys click save to exit the learning interface.

## Air conditioning settings

Click this icon [  ] to open or close the air conditioning interface.

# COMMON TROUBLESHOOTING GUIDELINES

FAULT	REASON	SOLUTION
Unable to boot	Power supply fuse burned out.	Replacement of the same type of fuse.
	Other factors cause microprocessors to work abnormally.	Reboot the unit using the reset button. Press the reset button with a pointed object.
When the ignition is switched off, all setting information is lost.	Replacement of batteries or fuses.	Reset the information and restore it after replacing the fuse or batteries.
The radio is ineffective	Weak radio signal.	Try again in a different location.
No image	Other factors cause microprocessors to work abnormally.	Reboot the unit using the reset button. Press the reset button with a pointed object.
Silent output	Small voice.	Increase the volume.
	Output line incorrectly connected.	Check output line connection.

## PRECAUTIONS ON POWER SUPPLY AND SPEAKER CONNECTIONS:

Do not connect the speaker cables of the power cord to the car battery; otherwise, the unit will be seriously damaged.

BEFORE connecting the speaker cables of the power cord to the speakers, check the speaker wiring in your car.

# SPECIFICATION

---
