6.5" WGY COAXIAL SPEAKER

6.5" 3-Way Coaxial Speaker

2. Step the speaker wires and connect them to the amplifier terminals. Use "+" to "+" and "-" to "-". Connection with reversed polarity will degrade the quality of production.

3. Connect the provided speaker cone to the speaker terminal while holding the lower portion of the speaker terminal.

4. Mount on the speaker as shown below.

5. Press and insert the object of the grille.

The speaker grille can be mounted without the grille, if you like.

Option: Mount on the Rear Tray.

You can mount the speakers on the rear tray of your car. Make sure that nothing obstructs around the mounting location of the rear tray.

- Make for mounting may already be cut out of the rear panel at the rear tray. In your mind, roughly the board and edge, do not interfere with any other parts, (such as the window, etc.) Also ensure that the speaker grille does not touch any inner things.

such as the window frame, door handles, arm rests, etc.

8. Make for mounting may already be cut out of the rear panel at the rear tray. In your mind, roughly the board and edge, do not interfere with any other parts, (such as the window, etc.) Also ensure that the speaker grille does not touch any inner things.

Rubber Surround

Our rubber surround is treated to maintain a consistent level of sound reproduction during long periods of operation within your vehicle.

Silk is light weight material, heat resistant and retains its shape even after prolonged use, allowing accurate sound reproduction in all situations.

Composite Injection Cone

Our treated composite injection cone is extremely rigid but still lightweight, allowing it to reproduce even deeper and more powerful bass notes.

Feel the music in your vehicle.

Our selected materials that work together, enabling you to truly hear and perform as designed to provide for a clean and seamless sound
